Hidden frame solar curtain wall design

Overview

What is a customizable hidden frame glass curtain wall system?

Customizable Hidden Frame Glass Curtain Wall Systems offer architects and developers an effective means of creating tailor-made solutions for their projects. Frameless corners, modular panels, tinted or oversized reflective glass options allow designers to achieve unique design goals while upholding structural integrity.

What is a hidden frame curtain wall?

For hidden frame curtain wall, its glass panels are bonded to the metal framework using high-strength structural silicone. This is its featured structure. It is a seamless glass façade with only minimal silicone joints seen from outside, because the metal framework is completely concealed behind the glass panels.

What is a durable hidden frame glass curtain wall?

Durable Hidden Frame Glass Curtain Walls from Durable Wall Systems are designed to withstand even the harshest environments, from coastal properties or extreme urban climates, down to coastal properties with coastal breezes.

What is a solar curtain wall?

The company's 'solar curtain wall' covered the entire side of a building with plastic solar film encased in glass. This installation was expected to provide 1.5 kW of power. Unfortunately, the company filed for bankruptcy in 2012 but they did help to further the solar power curtain concept. Another option comes from a company called SolarGaps.
