

EQACC SOLAR

High-efficiency Paraguayan solar-powered containers used in farms

Overview

What is a solarcontainer?

The Solarcontainer is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lays flat on the ground.

Why do you need a solar container unit?

Our solar containers ensure fast deployment, scalability, customization, cost savings, reliability, and sustainability for efficient energy anywhere. With our pre-configured solar container unit, you can get going quickly, and the folding solar panels for containers can be deployed in less than three hours.

What is a grow solar container farm?

The Grow Solar shipping container farms make it possible to grow delicious food 365 days a year with thousands of high-value crops like lettuces, leafy greens, herbs, roots, edible flowers, and more in just 320 sq. ft. Grow Solar Container Farm complexes are designed for all aspects of the cultivation process.

Can a hydroponic farm be powered by a solar panel?

We can also install industry-leading solar panel technology (optional), so your farm can be powered in some of the most remote environments on Earth. Our patented vertical hydroponic system allows people to cultivate highly nutritious food on small plots of land, with less labor and maintenance than traditional methods.
