# **Home battery storage in China in Netherlands**

## Overview

---

Do Dutch home battery purchases keep driving battery storage installations?

Dutch home battery purchases keep driving battery storage installations. According to Dutch New Energy Research's Nationaal Smart Storage Trendrapport 24/25, 410 MWh of new battery capacity was installed in the Netherlands in 2023 – 1 MWh is enough to power a couple hundred homes for a day.

What happened to battery storage in the Netherlands in 2023?

GREEN+ - 2023 saw a 260% increase in installed battery storage capacity in the Netherlands. We dig into the numbers in this new episode of Behind the Figures. Dutch home battery purchases keep driving battery storage installations.

How much battery storage is installed in the Netherlands?

The latest Trendrapport figures show how only 1.7% of the European battery storage is installed in the Netherlands. With the average battery storage capacity per capita in Europe being 48.4 Wh, the Netherlands is below the average with 34.9 Wh per person.

How many home batteries are there in the Netherlands?

In fact, the paper shows that 98% of the Dutch installations are small ones (less than 20 kWh). 56% of the total number of batteries purchased in the Netherlands last year (13,600 of 24,400) were small home batteries—less than 5 kWh—followed by bigger home batteries, with up to 20 kWh capacity.
