Home energy storage subsidies in Milan Italy

Overview

Will Italy support a centralised electricity storage system?

The European Commission has approved, under EU State aid rules a €17.7 billion Italian scheme to support the construction and operation of a centralised electricity storage system.

What is Italy superbonus solar?

The Italy Superbonus solar scheme has redefined what's possible in clean energy adoption. By removing upfront costs and returning more than the investment, it has empowered homeowners to go solar faster, smarter, and at scale. It's not just a subsidy—it's a national acceleration strategy for rooftop PV, energy storage, and building decarbonization.

How long does the res scheme last in Italy?

The scheme will run until 31 December 2033. The measure aims to facilitate the integration of renewable energy sources ('RES') in the Italian electricity system. The production of electricity by RES does not always coincide with periods of electricity demand.

How do I apply for the Italy superbonus solar benefit?

Applying for the Italy Superbonus solar benefit requires more than just installing panels. The process involves certified audits, specific documentation, and submission through national portals—especially the ENEA website, which tracks energy upgrades and carbon savings.
