# Homemade inverter battery pack

## Overview

---

What is a DIY battery pack?

A DIY battery pack is a custom-built energy storage solution created by connecting multiple individual battery cells, typically lithium-ion cells like 18650s, to meet specific voltage and capacity requirements. These packs are used in various applications, including electric vehicles, portable electronics, and renewable energy systems.

What is a DIY solar battery box?

A DIY solar battery box is a rechargeable portable power station that supplies AC electricity (110V, 60Hz) and USB charging. This all-in-one solution combines three main components: Here is a simplified electrical diagram for a solar battery box: The solar charge controller ensures safe and efficient charging of the battery with a solar panel.

How do I build my own battery pack?

Building your own battery pack can be a complex yet highly rewarding project. To ensure a successful and safe assembly, follow these detailed steps: Battery Cells: Choose high-quality cells that match your voltage and capacity requirements. Popular choices are Li-ion or LiPo batteries.

How do I connect a solar inverter to my solar panel?

Connect the two AC outlets to the inverter. Use the 4AWG cable to connect the inverter and the battery. Get the 12AWG wire and link the solar charge controller to the battery and the solar panel extension cable. For safety, don't forget to add 3 fuses between: Your solar battery box is now complete!
