# How big a water pump should I add to a 2kw inverter

12.8V6Ah

Nominal voltage (V):12.8  
Nominal capacity (ah):6  
Rated energy (WH):76.8  
Maximum charging voltage (V):14.6  
Maximum charging current (a):6  
Floating charge voltage (V):13.6~13.8  
Maximum continuous discharge current (a):10  
Maximum peak discharge current @10 seconds (a):20  
Maximum load power (W):100  
Discharge cut-off voltage (V):10.8  
Charging temperature (°C):0~+50  
Discharge temperature (°C): -20~+60  
Working humidity: <95% R.H (non condensing)  
Number of cycles (25 °C, 0.5c, 100%dod): >2000  
Cell combination mode: 32700-4s1p  
Terminal specification: T2 (6.3mm)  
Protection grade: IP65  
Overall dimension (mm):90\*70\*107mm  
Reference weight (kg):0.7  
Certification: un38.3/msds

How do I choose the right inverter size for my pump?

When selecting an inverter size for the pump, it is important to choose one that can handle the startup power as well as the running power demanded by the pump. Inverters come in various sizes, typically measured in watts (W) or kilowatts (kW).

What size inverter do I Need?

To determine the appropriate size of the inverter needed to run a pump, it is necessary to calculate the power requirements of the pump. The power requirements can be calculated using the following formula: Power (Watts) = Voltage (Volts) x Current (Amps) First, you need to identify the voltage and current requirements of the pump.

How to choose an inverter for a water pump?

When selecting an inverter for a water pump, consider the following factors:  
Output Power: The inverter's output power must be sufficient to handle the starting and running current of the water pump. Output Frequency: The inverter's output frequency must match the motor's rated frequency to ensure proper pump operation.

Do well pumps need an inverter?

Well pumps, which run on AC power, require an inverter to operate in off-grid systems or during power outages. The size of the inverter required for your AC well pump depends on a few critical factors: Wattage of the Pump: Inverter sizes are rated by their wattage capacity. To select the right inverter, you must know the wattage of your well pump.
