

**EQACC SOLAR**

# **How long is the life of rooftop solar panels**

## Overview

---

### How long do solar panels last?

Connect with a local solar provider for maintenance and repairs. Solar panels generally last for 25 to 30 years; they can produce power after this, but at a significantly lower rate than their original output. Maxeon's warranty covers its panels for 40 years. Solar panels slowly degrade, resulting in less and less electricity production over time.

### Do solar panels need to be replaced after 25 years?

After 25 years, your solar panels won't necessarily need to be replaced; however, their ability to absorb sunlight will be reduced. In this blog, we'll explain how long solar panels last, review solar panel degradation rates, and ways to make sure your solar panels last as long as possible.

### How long do solar inverters last?

Solar inverters have a typical service life of 10 years. This means your solar panels will still have 15 years of guaranteed power output when your first inverter reaches the end of its service life. If you're considering a solar power system with energy storage, home batteries also have a typical service life of 10 years.

### How long do monocrystalline solar panels last?

Generally speaking, the degradation rate of monocrystalline solar panels is 0.5% per year. This means that, after 30 years, most monocrystalline solar panels on the residential market will produce 87% of their original power output. To learn more about solar, check out our rundown the top 17 facts about solar panels.

## How Long Do Solar Panels Actually Last?

What Is 'Solar Panel Degradation rate'? Do Solar Panels Go Bad? When to Consider Replacing Your Solar Panels? What Other Solar System Components Might Need replacing? Can You Extend The Lifespan of A Solar Panel? Should You Replace Your Solar Panels After 25 years? There is technically no expiration date on solar panels. However, over time, they naturally tend to become less efficient at producing energy. Some panels can also break due to physical damage from extreme weather conditions. For example, when there is extreme cold, reoccurring hail storms or physical damage caused by falling debris, solar panels c See more on solarreviews Roofing Calculator
