

# How long is the single energy storage project expected to be completed

## Overview

---

When will Tesla's Energy Storage megafactory be finished?

CFP Construction of U.S. carmaker Tesla's energy storage megafactory in Shanghai is expected to be finished by the end of this year, according to Tesla China. The factory, which broke ground in late May, will be dedicated to manufacturing the company's energy-storage batteries, Megapack.

When will Tesla's energy storage factory in Shanghai start production?

Tesla's energy storage factory in Shanghai is expected to complete construction by the end of this year, with production set to begin in the first quarter of 2025. Tesla's (NASDAQ: TSLA) Megafactory in Shanghai is nearing completion of construction in preparation for a planned operation in the first quarter of next year.

What drives energy storage project development?

Globally, energy storage project development is increasingly driven by the utility-scale segment, with mandates and targeted auctions driving gigawatt-hour projects in markets like China, Saudi Arabia, South Africa, Australia and Chile.

Should energy storage be removed from energy grid connection?

For energy storage, the new Chinese policy emphasized the need to remove energy storage as a prerequisite for renewable energy project grid connection, a requirement that has been a major driver for battery build. Nonetheless, BNEF still expects strong demand for batteries, as the policy doesn't explicitly require mandates to stop.
