How many 5G base stations does the communication plan to build

Overview

How many 5G base stations will China have by 2025?

China's Ministry of Industry and Information Technology (MIIT) plans to more than triple the number of 5G base stations over the next four years, targeting a total of 3.64 million by end-2025, local newspaper China Daily reported. China aims to have about 3.64 million 5G base stations by the end of 2025.

How many 5G base stations are there?

Local carriers deployed a total of 235,000 5G base stations in the first five months of the year; 5G mobile stations currently account for 35.3% of the total number of mobile base stations in the country.

Why are telecom companies installing indoor 5G base stations?

To solve this, telecom companies are installing indoor 5G base stations, which are growing at a compound annual growth rate (CAGR) of over 30%. For businesses operating in offices, malls, or large commercial spaces, installing indoor 5G solutions can greatly enhance connectivity.

How much data does 5G generate a day?

With millions of base stations in operation, 5G networks generate an enormous amount of data. It's estimated that 5G base stations worldwide produce more than 500 petabytes of data daily. This data includes network traffic, user behavior, and real-time analytics from connected devices. For telecom providers, managing this data is a major challenge.
