# **How many 5G base stations has South America Communications built**

## Overview

---

How big is the 5G base station market?

Macro cells represented USD 22.9 billion and 61.3% of the 2024 5G base station market share, providing umbrella coverage and mobility anchor services. Yet small cells are forecast to expand at a 29.4% CAGR, pushing their slice of the 5G base station market size toward USD 50 billion by 2030.

Which countries dominated the 5G base station market in 2024?

Asia Pacific dominated the global 5G base station market in 2024. Suppliers of 5G base stations were benefited from the rapid development of 5G technology. Huawei, Ericsson, Nokia, ZTE, and Samsung are among the world's leading suppliers. In 2024, these five vendors control almost 96.12 % of the global market.

How many countries in Latin America have 5G services?

As of March 2023, eight countries in Latin America had launched commercial 5G services. The number of 5G connections is forecast to grow steadily over the next couple of years, before accelerating in the second half of the decade as new 5G markets go live and existing networks expand to cover new areas.

How many 5G base stations are there in the United States?

While China leads in sheer numbers, the U.S. is making steady progress. By late 2023, the country had between 150,000 and 200,000 active 5G base stations. The deployment strategy in the U.S. is different from China's, as it relies on private investment rather than government-led initiatives. Is this article too long?

## How many 5G base stations has South America Communications built?

---

### South & Central America 5G Base Station Market

The demand for 5G base stations in South America (SAM) has increased recently as the region has witnessed a significant increase in mobile device adoption, including laptops, ...
