### System Layout

## Overview

---

What is the global 5G base station market size?

The global 5G base station market size was estimated at USD 33,472.5 million in 2023 and is projected to reach USD 253,624.3 million by 2030, growing at a CAGR of 33.5% from 2024 to 2030. The surging demand for high-speed connectivity is a significant factor driving the growth of the 5G base station market.

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

How will Europe's 5G base station market evolve from 2024 to 2030?

The Europe 5G base station market is poised for significant growth from 2024 to 2030. The European regulatory environment supports 5G deployment, with policies designed to facilitate the rollout of 5G infrastructure. This includes streamlined permitting processes, clear spectrum allocation strategies, and efforts to reduce regulatory barriers.

Why do we need a 5G base station?

As the number of IoT devices continues to grow, particularly in sectors such as healthcare, agriculture, transportation, and manufacturing, there is an increasing need for a robust and expansive 5G network. This demand is driving the installation of more 5G base stations to ensure that IoT systems can operate efficiently and reliably.
