# How many hydrogen energy stations are there in Brazil

## Overview

---

How many green hydrogen projects are there in Brazil?

From pv magazine Brazil A mapping conducted by H2 Brazil, a project resulting from a partnership between the German Agency for International Cooperation (GIZ) and the Brazilian Ministry of Mines and Energy, has identified at least 42 green hydrogen production projects in the country of different sizes and stages of development.

How many hydroelectric power stations are there in Brazil?

According to the Associação Brasileira de Distribuidores de Energia Elétrica (ABRADEE) there are 201 hydroelectric power stations in Brazil with a nameplate capacity of more than 30 MW; the total capacity of these power stations in 2015 was 84,703 MW.

Why is green hydrogen important in Brazil?

The production of green hydrogen is seen as a way to tap Brazil's enormous potential for renewable generation. Just from projects under development, there are 99 GW of solar energy and 25 GW of wind energy capacity. Electricity corresponds to 73% of the production cost of green hydrogen.

How much does green hydrogen cost in Brazil?

For the green hydrogen produced in Brazil to become competitive, the price level for renewable energy in the country should decrease to between \$10/MWh and \$30/MWh (BRL 149/MWh), according to estimates presented at the Intersolar Summit Nordeste.
