

# How many meteorological base stations are there in Honduras

## Overview

---

What is the hottest weather in Honduras?

The hottest meteorological summer from June to August, based on all 7 weather stations in Honduras, was recorded in 2020 with an average temperature of 30.2 °C. This average temperature will normally be measured every four to six hours, thus also including the nights. Normally, this value is 27.7 degrees Celsius.

How many weather stations are there?

All sources with at least 100 weather stations are listed. Station numbers are shown in logarithmic scale. International collaboration to create and maintain international, freely accessible datasets greatly facilitates research in many scientific fields.

What is the climate like in Honduras?

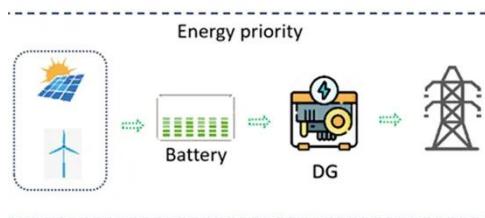

The climate in Honduras is very warm, with an annual average of 32 degrees, but has few truly tropical and sticky months. It is warm or hot yearlong. The warmest and雨iest part of the country is Pacific coast. The coldest is Caribbean coast. Due to less rain, the best time for traveling is from December to April.

Which weather station density is the highest in the world?

. GHCN-Daily weather station density over the study domain is one of the highest globally, with greater than 100 snow depth measuring stations per 5°grid (Jaffrés, 2019).
