How many solar power plants are in Laos?

VIENTIANE, Feb. 1 (Xinhua) -- A total of 58 solar power plants have been completed or under construction across Laos with a total installed capacity of 7,656 MW, local daily Vientiane Times reported on Tuesday. Eight of these plants have been completed and 50 are under construction, said the report.

How much power will Laos have?

Of this amount, 77.59 percent will come from hydropower and the rest will come from solar, wind and coal-fired power plants, said the report. Laos' capacity for solar power is expected to range from 10,000 MW to 15,000 MW, while wind power potential is estimated at about 100,000 MW, according to the report. ■.

How many solar power plants have been completed?

Eight of these plants have been completed and 50 are under construction, said the report. The Ministry of Energy and Mines reported the progresses made in this area of development at a recent meeting to discuss the direction of solar power development with authorities at the central and local levels.

How much electricity will Laos produce by 2030?

These developments will support government efforts to increase the amount of energy exported and minimize the amount of electricity re-imported from neighboring countries in the dry season. By 2030, it is planned that Laos will produce another 5,559 MW of electricity.
