

**EQACC SOLAR**

# **How much does a 140 kilowatt solar panel cost**

## Overview

---

What is a solar panel cost calculator?

A solar panel cost calculator estimates the costs and savings of installing a solar PV system. It is essentially an online tool where customers input data to receive information about the estimated cost of installing a solar PV system, potential savings on electricity bills, available incentives, and the payback period for the investment.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. <sup>1,2,12</sup> This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 – \$26,400.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's “cost per watt” is a little like the “price per square foot” when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a 5kw Solar System cost?

Below is a breakdown of pricing for different home sizes to help you plan your investment. A 5KW solar panel system is typically sufficient for modest households with minimal energy requirements. The average cost for such a system is between \$12,000 and \$16,000.
