Overview

How much does a 15kW solar system cost?

Buy the lowest cost 15kW solar kit priced from \$1.13 to \$2.00 per watt with the latest, most powerful solar panels, module optimizers, or micro-inverters.

How much do solar panels cost?

The price of solar panels changes depending on where you live, but the average for installation is just under \$29,000 or \$2.75 per watt. On the high end, we talked to a solar customer in Hawaii who spent \$100,000 going solar. Dion in Nevada said their 10-kW system cost about \$20,000, which is about the national average price for a 7-kW system.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How big is a 15 kW solar system?

Most solar panels have a capacity of around 300 watts. Therefore, to achieve a 15kW solar system, you will need at least 50 solar panels or more. Each panel takes up approximately 17 square feet of space, resulting in a total footprint of 850 square feet for the entire system.
