# **How much does a 5P solar air conditioner cost**

## Overview

---

How much does a solar air conditioner cost?

It's an air conditioner powered by energy harvested from the sun. It is sustainable, and with every year that passes, solar energy becomes more affordable. Current cost averages \$2.50 to \$3.00 per watt. A 6,000 watt system costs about \$15,000 to \$18,000 for panels, battery, inverter and wiring.

What is a solar air conditioner?

Solar air conditioners are solar-powered air conditioners designed to efficiently and effectively provide cooling to a room. Solar air conditioners use solar panels to power the air conditioner, and solar hotspot energy gives much power to the air conditioner's condenser and refrigerant.

Are solar AC units good for the environment?

Solar ac units offer environmental benefits, such as reducing grid demand and load shifting during peak usage. Plus, solar air conditioning units reduce energy costs and can help lower greenhouse gas emissions. Air conditioning units that cool your home with solar power can save money and help the environment.

How many Watts Does a solar powered air conditioner need?

The SW-HYBRID-09 9000 BTU needs 650 watts, so two 330W panels would power it. The SW-HYBRID-24 24000 BTU needs 1,600 watts, so five 330W panels are recommended. There is more information on this below when climate factors are discussed. How much does a solar powered air conditioner cost to operate?

Anywhere from \$0 to a few dollars a month.
