Air Cooled/Liquid Cooled

## Overview

---

The basic cost to Install Solar Lighting is \$74.57 - \$102 per fixture in October 2025, but can vary significantly with site conditions and options. How much does a solar light cost?

These lights reside off the main power grid and can be installed in remote locations. Because of the advanced technology required for solar lights, they are more expensive, averaging about \$3000 per light. That includes the light fixture, the solar panel, controller, pole, and the smaller components that make up the light.

How much do solar street lights cost?

When comparing the total costs of traditional and solar lighting, there appears to be a clear winner. Overall, solar street lights cost around \$4,800 over 5 years, while standard costs a steep \$8,800 because of trenching and installation costs. As before, this is the cost of one street light.

Do solar street lights save money?

While solar street lights may have higher initial costs compared to traditional street lights, they offer significant savings over time: Energy Savings: Since solar street lights use renewable energy from the sun, they eliminate electricity bills, which can save thousands of dollars over their lifespan.

How long do solar lights last?

Truth be told, solar lights actually require less maintenance than traditional lighting systems. The typical lifespan for a traditional street light averages around 5,000-8,000 hours, which is slightly less than a year of usage, while solar LED lights last 5-7 years.
