# **How much does an off-grid solar-powered container cost in Africa**

## Overview

---

Costs vary depending on size, number of containers, and systems installed. Expect a basic off-grid setup to start around \$50,000, with fully featured homes ranging higher. What is the cost of an off-grid solar system?

An off-grid solar power system costs at least \$40,000 for a typical Australian home to provide almost the same convenience as being on-grid. Why so much?

.

Should you buy an off-grid solar system in South Africa?

If you purchase an off-grid solar system in South Africa, you won't be connected to Eskom's power grid. You'll have zero access to any type of power grid. The advantage of a stand-alone system is that the cost of initial installation is greatly reduced due to the system not having to be connected to a power grid.

What is the real cost of South Africa's power grid?

The real cost of South Africa's power grid, including the cost of generation (coal, nuclear, etc.), transmission, and distribution, is estimated to be R200 billion or more. This is significantly higher than the written-down book value at historic cost of R26.4 billion, reported in March 2006.

What is an off-grid Solar System?

A typical off-grid solar system includes Once installed, it's self-sufficient. There's no backup from the grid, so you'll need to size everything right for your actual needs. Some want energy freedom. Others live far from the nearest utility line. Some want resilience during outages. Others just want to cut back on bills and impact.
