### DISTRIBUTED PV GENERATION + ESS

## Overview

---

How much does a curtain wall cost?

According to Hardev, the installed cost of passive curtain wall (industry jargon for an ordinary glass exterior) is on average \$100 per square-foot, despite varying considerably. He suggests that an active (solar cell) curtain wall would cost closer to 30 percent more, or \$130 per square-foot, including wiring.

Are solar curtains a good investment?

Though it's easy to suspect that not all of a product's reviews are genuine, it still seems that solar curtains have satisfied quite a few real customers. Overall, these reflective curtains seem like a cost-effective way to add a little energy efficiency to your home.

What is NREL's solar-plus-storage cost benchmarking work?

This work has grown to include cost models for solar-plus-storage systems. NREL's PV cost benchmarking work uses a bottom-up approach. First, analysts create a set of steps required for system installation.

Is China's solar industry undergoing a downturn?

China's solar sector, which dominates global production, is suffering one of the deepest and longest downturns in the industry's history. In the first half of this year China installed 256 gigawatts of solar capacity — more than twice the rest of the world combined, according to energy think-tank Ember.
