How much does it cost to install a solar water pump

Overview

How much does a solar water pump cost?

The cost varies dramatically. A small, all-in-one solar fountain pump kit can be \$20 – \$50. A larger solar well pump costs between \$1,200 and \$3,000, for an average of \$2,000. Prices depend on the well pump size, flow rate, and more. What are the disadvantages of a solar water pump?

.

Are solar-powered water pumps worth it?

There are no running costs with solar-powered water pumps, and they are really easy to install, meaning you don't have to worry about mains wiring or a complicated set-up. While solar panel powered pump kits work best in full sun, many of our solar pump kits also come with a battery back-up, so they can keep pumping even when the sun isn't shining.

How much does it cost to install solar panels?

The following costs are inclusive of the pump, solar panels, controller, solar wiring, splice kit and hose barb connectors BUT NOT the mounting for the solar panels, which will run you as little as \$200 to \$2,000 or more depending on the number of solar panels.
