How much does it cost to upgrade Huawei s communication equipment base stations

Overview

What is Huawei base station backhaul microwave?

Based on leading wireless, transmission, and datacom technologies, Huawei base station backhaul microwave solution provides fiber-level broadband wireless backhaul capabilities, ultra-low latency, fully modular architecture design, and co-site integration with wireless networks.

How much does it cost to replace Huawei equipment?

Strand Consult estimates that the cost to replace Huawei equipment is but \$3.5 billion, or €6.5 (7 dollars) per mobile subscriber. Notably mobile operators must upgrade their equipment for technological reasons, regardless of whether Huawei and ZTE is in the market or not.

How much does it cost to replace Huawei & ZTE equipment?

A conservative estimate suggests that replacing the Huawei and ZTE equipment purchased since 2016 (which probably can be upgraded to 5G) will cost \$3.5 billion. This is equal to \$8.75 billion x 40 percent. This amount compares to 14 months of total European radio access network (RAN) purchases, a small number both for Europe and the world.

How much does it cost to upgrade a 4G tower?

Instead of building entirely new sites, many telcos upgrade existing 4G towers to 5G, which costs between \$20,000 and \$50,000 per site. This is a more cost-effective approach, as it utilizes existing infrastructure. The challenge is ensuring that these upgrades meet the full potential of 5G. Simply adding new radios may not be enough.
