How much does solar panels cost in Tallinn

Overview

How much energy does a solar PV system produce in Tallinn?

Average 1.54kWh/day in Autumn. Average 0.50kWh/day in Winter. Average 3.97kWh/day in Spring. To maximize your solar PV system's energy output in Tallinn, Estonia (Lat/Long 59.433, 24.7323) throughout the year, you should tilt your panels at an angle of 49° South for fixed panel installations.

How to optimize solar generation in Tallinn Estonia?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in Tallinn, Estonia as follows: In Summer, set the angle of your panels to 42° facing South. In Autumn, tilt panels to 61° facing South for maximum generation.

What angle should solar panels be installed in Tallinn?

To optimize the efficiency of a solar PV system installed here, it is recommended that panels be tilted at an angle of 49 degrees facing South. However, Tallinn's position within the Northern Temperate Zone presents some challenges for consistent solar power generation throughout the year.

Is Estonia a good country for solar PV?

Estonia ranks 58th in the world for cumulative solar PV capacity, with 414 total MW's of solar PV installed. Each year Estonia is generating 311 Watts from solar PV per capita (Estonia ranks 13th in the world for solar PV Watts generated per capita). [source]
