How much does the Serbian energy storage power supply cost

Overview

Will Serbia be able to supply electricity at market prices?

For the first time, consumers in Serbia are to be supplied electricity at market prices by a non-state-owned supplier.

What is the main energy source in Serbia?

Coal remains the primary energy source in Serbia, particularly lignite, which is extensively mined and used for power generation. The country's energy infrastructure is heavily dependent on coal-fired power plants, which provide the bulk of its electricity supply.

Does Serbia have a diversified energy source?

While coal dominates, efforts are underway to diversify Serbia's energy sources, particularly towards increasing the share of renewable energies like hydro, wind, and solar power, in response to environmental concerns and global energy trends.

Why are electricity prices so high in winter in Serbia?

If, on the other hand, the production of electricity is small and demand is high, prices will increase. Therefore, the price of electricity is often highest in winter, as the need for electricity for heating is highest. Electricity spot prices in Serbia today, hour by hour. Including prices for the last 30 days.
