# How to use solar lights at home

## Overview

---

### How to use solar lights?

Just keeping enough sunlight to power the solar lights. Also come with a USB-powered cord which is designed for indoor decorations. When in the rainy/cloudy days, you could connect the USB cable to light up the backyard lights. Also the plug come with automatic timer function - 6 hrs ON then 18 hrs OFF. No more manually operation everyday.

### How to DIY a solar light?

To DIY a solar light, you will need some products. A drill is to pierce the jar. If you are skillful when it comes to wires, you can also use the wire nut to solder the switch and the wires. But that will come later in the article.

### How to install solar light?

In solar light, circuit boards keep a connection with cable, battery, and light. You have to connect the light to the circuit board perfectly. The light will get power from the board through the cable you have already installed. Before you finish everything, measure the voltage to connect it correctly.

### Should you buy a homemade solar light?

However, a homemade solar light has some limitations. You can avoid them by adding the best quality products. On the contrary, if you want extra brightness and a light from a professional manufacturer, you can buy a complete solar lighting package from a famous brand.
