# **Huawei 5g communication green base station abroad**

## Overview

---

Which countries use Huawei's 5G base stations?

**Switzerland:** Switzerland is one of the European countries that have chosen Huawei's 5G base stations for their network infrastructure. The deployment has helped Switzerland achieve high-speed internet connectivity across the country. **Canada:** Canada is another country that has adopted Huawei's 5G base stations for its network infrastructure.

Which countries have a 5G base station?

**China:** Being the home country of Huawei, China was one of the first countries to deploy Huawei's 5G base stations. The deployment has been extensive, covering major cities and regions throughout the country. **South Korea:** South Korea is another country that has extensively deployed Huawei's 5G base stations.

Where are Huawei 5G base stations located?

Huawei has deployed its 5G base stations in several countries worldwide, including China, South Korea, UAE, Switzerland, and Canada. The deployment has had a significant impact on network performance by offering increased speed and bandwidth, improved latency, greater capacity, and enhanced coverage.

Why is Huawei deploying 5G in Switzerland?

The deployment has significantly improved network performance and coverage in the country. Switzerland: Switzerland is one of the European countries that have chosen Huawei's 5G base stations for their network infrastructure. The deployment has helped Switzerland achieve high-speed internet connectivity across the country.
