# Huawei Majuro Power Storage Vehicle

## Overview

---

What does Huawei's patent mean for EV battery development?

Huawei's patent focuses on a few key improvements that address common problems in solid-state battery development, including: This gives the battery a much longer driving range. Under China's CLTC test cycle, the range reaches 3,000 km. Under the stricter U.S. EPA test, it would still exceed 2,000 km, well beyond most current EV models.

Will Huawei's new battery revolutionise China's electric vehicle landscape?

Huawei's recent unveiling of a revolutionary solid-state battery, promising a remarkable 1,864-mile range with a mere five-minute charge, is poised to redefine the electric vehicle landscape and elevate China's standing in the global race for sustainable energy solutions.

Will Huawei's patented solid-state battery push EV limits?

Huawei's patented solid-state battery promises 3,000 km range & 5-min charging, pushing EV limits — but real-world hurdles remain.

Does Huawei have a sulfide battery?

Huawei has intensified its ambitions in advanced energy storage by patenting a sulfide-based solid-state battery capable of achieving driving ranges of up to 3,000 kilometres and ultra-fast charging in just five minutes.
