# Huawei PV Station Inverter Communication

## Overview

---

Why is Huawei fusionsolar smart PV management system not working?

Huawei FusionSolar Smart PV Management System shows that the communication with the inverter is interrupted. The RS485 cables among inverters are loose or disconnected. The PV string is not properly connected, and the inverter has no DC input. The baud rate or RS485 address of the inverter is changed. The Smart Dongle is faulty.

How does a fusion solar inverter connect to a phone?

Can connect to LUNA2000 batteries. The inverter connects to the FusionSolar Smart PV Management System through the 4G Smart Dongle. The inverter connects to a phone through a Smart USB-WLAN Adapter (shortened to WLAN module in this document), Bluetooth module, or a data cable.

How does a sun2000 inverter connect to a phone?

The inverter connects to a phone through a Smart USB-WLAN Adapter (shortened to WLAN module in this document), Bluetooth module, or a data cable. You can use the SUN2000 app to view the running information and set inverter parameters locally.

How do I change the inverter in my PV plant?

Step 1 On the home page of the management system, select the plant to be modified from the plant list. Step 2 On the Device Management page, select the target device, and then delete or replace the device. Replacing inverters does not affect the total energy yield of the PV plant.
