

EQACC SOLAR

Huawei fully automatic cylindrical solar container lithium battery

Overview

The storage system made by Huawei LUNA 2000 is available. The system can be modulated with lithium batteries from 5KWh to 15KWh. What are Huawei's intelligent lithium battery solutions?

Huawei's intelligent lithium battery solutions provide dynamic peak shifting, transforming traditional backup power systems into efficient energy storage solutions that enhance system flexibility and reliability.

What is the storage system made by Huawei Luna 2000?

The storage system made by Huawei LUNA 2000 is available. The system can be modulated with lithium batteries from 5KWh to 15KWh. High-voltage lithium iron phosphate (LFP) batteries have a very stable and resistant chemical structure. This technology allows optimization of the energy level of the battery pack.

How does the Huawei Luna battery pack work?

This technology allows optimization of the energy level of the battery pack. Huawei Luna consists of the Power Module, the electronic component and 5 kWh battery packs. The modular design allows to expand the storage capacity from 5 KWh up to 15 KWh with the possibility of stacking up to 3 battery packs (of 5 kWh each) for each system.

Which battery is compatible with the Huawei sun2000 inverter?

The new Huawei LUNA2000 Lithium Battery 10kWh+BMS. This high-voltage battery will be compatible with a wide variety of self-consumption inverters on the market, but its use with the new Huawei SUN2000 single-phase inverters, all L1 and M1 models, is especially interesting. Huawei LUNA2000 Huawei LUNA Installation Guide Huawei LUNA2000 Manual EN
