# **Hungarian home solar container battery BESS**

## Overview

---

Will Hungary's new battery energy storage system help Green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

Is Hungary stocking up on battery backup?

Hungary isn't alone in stocking up on battery backup as it charts its green energy path. In neighbouring Bulgaria, a massive 124 MW/496 MWh battery energy storage system went live in Lovech earlier this year.

How will a new solar power plant help Hungary's power grid?

The new facility supports a growing push to green Hungary's power grid, especially as solar capacity surges. With no moving parts and a rapid response time, batteries like this are designed to stabilize the grid by storing excess solar power and releasing it when demand peaks.

Which country is preparing to deploy 200 mw/400 MWh of battery storage?

Meanwhile, Serbia—Hungary's southern neighbour—is preparing to deploy 200 MW/400 MWh of battery storage capacity. The planned systems are expected to be collocated with utility-scale solar farms, helping the country manage intermittency and improve energy resilience. The Dunamenti BESS is part of MET Group's broader play across Europe.
