

Hungary's new energy storage power source

Overview

Where is Hungary's largest battery energy storage system located?

From ESS News Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in Százhalombatta, located close to Budapest. The new facility boasts a total power output of 40 MW and a storage capacity of 80 MWh.

Will Hungary's new battery energy storage system help Green the grid?

The new facility supports a growing push to green Hungary's power grid. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition.

What is Hungary's Energy Strategy?

Hungary's energy strategy is based on two pillars, nuclear and renewable energy. The four blocks of Hungary's only nuclear power plant have a combined capacity of 2,000 megawatts (MW). Hungary is expanding the Paks power plant with two new blocks adding 1,200 MW each.

How does Hungary get its electricity?

A paid subscription is required for full access. Hungary sources most of its electricity from nuclear power plants. In 2022, 44.6 percent of the total electricity generation of the country was derived from this source. Gas-fired power plants ranked second, while solar energy was the third largest energy source in the country.
