

EQACC SOLAR

Hybrid energy isolation lightning protection system for solar container communication stations

Overview

What is a lightning protection system for ground-mounted PV systems?

Protect components from avoidable damage and costly failures. A lightning protection system for ground-mounted PV systems protects them from direct lightning strikes and transient overvoltages. It protects the power plant area as well as the modules, the inverters and the plant monitoring system.

What is a lightning protection system?

The photovoltaic system is the core element in professional energy management. Protect components from avoidable damage and costly failures. A lightning protection system for ground-mounted PV systems protects them from direct lightning strikes and transient overvoltages.

What is photovoltaic protection?

We offer comprehensive protection concepts for surge protection, earthing and equipotential bonding, as well as for the external lightning protection of photovoltaic systems. The photovoltaic system is the core element in professional energy management. Protect components from avoidable damage and costly failures.

Can PV systems be protected from lightning?

Despite the high lightning risk that PV systems are exposed to, they may be protected by the appropriate application of Surge Protection Devices and a Lightning Protection System.

One must give thoughtful and careful consideration to the following:

Hybrid energy isolation lightning protection system for solar contain

Protecting PV installations against surges , DEHN

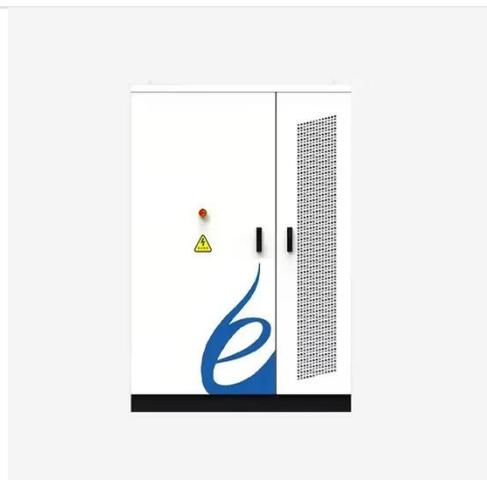

A failure of the PV system has expensive consequences: There is no electricity generation for personal use or income from energy infeed, and additional costs are incurred for repairs. We ...
