

# India 500 000 sets of battery cabinet project

## Overview

---

Which is India's largest battery energy storage system?

Adani Group says it will install a 1,126 MW/3,530 MWh battery energy storage system (BESS) at its Khavda renewable complex, marking India's largest and one of the world's biggest single-site deployments. From pv magazine India.

How much battery energy storage capacity is available in India?

Between 2022 and May 2025, India auctioned approximately 12.8GWh of battery energy storage system (BESS) capacity for both hybrid and standalone applications. However, only about 219MWh of BESS capacity is reported to be operational, leaving a large pipeline of projects under construction.

How big is Adani Group's battery energy storage system?

Data Protection Policy Adani Group says it will install a 1,126 MW/3,530 MWh battery energy storage system (BESS) at its Khavda renewable complex, marking India's largest and one of the world's biggest single-site deployments.

How will chains meet the rising demand of battery storage in India?

ply chains will provide the foundation to meet the rising demand of battery storage in India. The battery manufacturing sector in India is still in its na cent stages, with a majority of the players engaged in assembling and packaging f batteries. This translates into negligible manufacturing value being captured within India. Low availability
