Indoor solar panel inverter

Overview

Do you need a solar inverter?

Solar inverters are a necessary but often forgotten part of a home solar panel system since they convert sunlight into usable electricity for your home appliances. Without a solar inverter, you wouldn't be able to use those solar panels to power your home.

What is a solar panel with inverter?

A solar panel with inverter is essential for harnessing sunlight and transforming the direct current (DC) produced by photovoltaic systems into alternating current (AC) for home utilization. The three main categories of photovoltaic converters are: Each providing unique benefits suited to various installation requirements.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

Which solar panel has a microinverter?

The Q.Tron AC module is actually a solar panel with a built-in microinverter. And, since we named it "Rookie of the Year" in our best solar panels for 2025 ranking, it should come as no surprise that we think they're the best new inverter on the block too. Q Cells is a well-established solar panel manufacturer.
