Industrial frequency uninterruptible power supply ups

Overview

What are industrial uninterruptible power supply systems (UPS systems)?

We cater to multiple sectors for industrial uninterruptible power supply systems (UPS Systems) through standard or customized solutions. From high amperage manufacturing processes to miniscule backup requirements, these systems can offer efficiency in every application.

What is an industrial UPS system?

The industrial UPS systems produced by SCU, a professional UPS supplier, are specially designed for industrial application with high performance, high efficiency and high protection level. The industrial UPS system provides uninterrupted high-quality industrial uninterruptible power supply for modern manufacturing.

What is a static uninterruptible power supply (UPS)?

Our static uninterruptible power supply (UPS) systems comply with the VFI-SS-11 classification according to IEC 62040-3. With their robust industrial design, they support a secure consumer supply in continuous operation.

What are the different types of industrial UPS power supply systems?

600V, 480V, 415V, 400V, 380V, 230V and 208V With the latest sophisticated features installed, we can ensure higher levels of efficiency and load protection from multiple issues pertaining to power. At the same time, we assure cost-effectiveness in our industrial UPS power supply systems to safeguard your investments in these critical systems.
