

EQACC SOLAR

Intelligent Folding Container for Fire Stations

Overview

What types of fire training technologies can a container structure accommodate?

Our container structures can be designed to accommodate any and all of our proprietary fire training technologies (digital, gas fueled and carbonaceous). Enhance your training by including tactical elements such as forcible doors, cold cut panels and backdraft indicators in your design.

Who can use containerized fire training structures?

Our containerized fire training structures can serve a wide range of industries requiring fire and safety training including airline, military, oil and gas, petrochemical, fire departments, and training academies.

Why should you use the Attacj digital fire training system?

Every system includes built in safety features to keep your trainees safe and provide ample teaching opportunities. The Attacj Digital Fire Training System can be used in hands-on training when fire suppression is the objective, and also to add realism in fire training situations where fire suppression is not the main objective.
