Inverter v60

Overview

What is a foxess V Series grid connected inverter?

Its compact design fits various installations. The FOXESS V Series Grid Connected Inverter, designed for three-phase commercial installations, delivers exceptional performance and reliability for you. With models ranging from 30kW to 75kW (V30, V33, V36, V40, V50, V60, V75), it achieves a maximum efficiency of 98.7%, ensuring optimal energy yield.

How many MPPT trackers does a V series inverter have?

With four MPPT trackers, the inverter supports high-power output in stand-alone mode, maximizing generation windows. Furthermore, the V Series Grid Connected Inverter offers PV string current monitoring for precise performance tracking, ensuring operational efficiency.

What is a foxess V series commercial inverter?

The FOXESS V Series three-phase commercial on grid inverter ranges from 30 to 75kW with a maximum efficiency of 98.7%. It features IP66 protection and C5 anti-corrosion for harsh environments. Equipped with advanced AFCI for arc-fault detection and PID recovery for system longevity.
