Iran base station site distribution data

Overview

What is a countrywide geo-intelligence dataset of Iran?

AllSource Analysis countrywide geo-intelligence dataset of Iran includes the identification and distribution of military and civilian infrastructure. A portion of the AllSource Analysis countrywide dataset includes the identification and distribution of airfields and air defense sites around the country.

How many power plants are in Iran?

Iran has 212 power plants totalling 77,400 MW and 74,618 km of power lines mapped on OpenStreetMap. If multiple sources are listed for a power plant, only the first source is used in this breakdown.

How important is the location of Base Transceiver Station (BTS) antennas?

The location of Base Transceiver Station (BTS) antennas plays an important role in the proper serviceability and coverage of mobile connections in each region. Finding a proper location for these antennas is a major challenge for operators in each country, as service costs besides maximum network coverage must be acceptable and competitive.
