Is it worth investing in solar panels

Overview

Are solar panels worth the investment?

For more and more homeowners going solar, batteries are becoming essential, rather than a nice-to-have, for peace of mind and maximum savings. While solar works for most homeowners, certain situations make it less attractive or financially unviable. Here's when solar panels typically aren't worth the investment::

Is solar a good investment?

Here's when solar is typically worth it: Solar panels are a long-term investment that generate free electricity for 25-30 years. If you own your home, you'll capture all those benefits. Renters should speak to their landlords before making plans to install a solar energy system. The more you pay for electricity, the more you'll save by going solar.

Can solar panels save you money?

If your state has robust net metering or you have high energy costs, your solar panels could start saving you money in (relatively) short order. If you aren't planning on moving for many years or have reason to believe the short-term energy savings and the boost to your home's value will recoup your investment, solar could pay off.

Is going solar worth it?

If you don't have high energy costs or your state makes it harder to go solar, it might not be worth it financially. Even after weighing all the pros and cons, the decision to go solar is a highly personal one.
