

## EQACC SOLAR

# Is the 21700 battery safe

**LFP 12V 100Ah**

## Overview

---

Is the 21700 battery safe to use?

The 21700 battery is safe to use as compared to other types of lithium-ion batteries. This battery comes with a built-in battery management system that properly checks the conditions of the battery and avoids any issue creation. What is the working life of the 21700 battery?

The 21700 battery recharged after 3 to 6 months.

What are 21700 batteries?

21700 batteries are lithium rechargeable batteries that come in various versions with differences in battery capacity, pulse rate, drain current, charging current, and battery terminals, among other things.

Are 21700 rechargeable batteries legit?

All of our 21700 rechargeable batteries are batch-tested and fully authenticated, so you can rest assured they are obtained from a legitimate source. 21700 batteries measure 21mm x 70mm in diameter and carry a considerably larger capacity than 18650 batteries.

Is a 21700 protected battery better than an unprotected battery?

A 21700 protected battery is safer than an 21700 unprotected battery (less likely to overheat, burst or start on fire). Unprotected 21700 batteries are cheaper, but we do not recommend their use. Unprotected batteries should only be used where the load/draw and charging is externally monitored and controlled.
