

EQACC SOLAR

Italian battery energy storage power station

Overview

Does Italy have a new battery energy storage system?

Italy has taken a major step forward in its energy transition efforts, giving the green light to 361 MW of new battery energy storage systems (BESS) spread across three regions—Lazio, Puglia, and Sardinia.

How is Italy transforming its energy system?

Italy, like much of Europe, is undergoing a rapid transformation in how it generates and distributes energy. With solar PV and wind power ramping up quickly, grid operators are increasingly reliant on energy storage systems to manage variability and avoid curtailment of renewable energy during periods of oversupply.

What is the largest storage facility in Italy with Second-Life batteries?

Inauguration of Pioneer, the largest storage facility in Italy with second-life batteries, providing power to the airport Leonardo da Vinci in Fiumicino.

How much power will Engie have in Italy?

Engie aims to reach 1.6 GW of installed power in Italy by 2030. Before these acquisitions in Puglia, the company could count on 14 photovoltaic plants (152 MW), 17 wind farms (400 MW) and four storage batteries (48 MW). From pv magazine Italia.
