Jakarta Base Station Communication System Quote

Overview

Why did JRC deliver a coast radio station to Indonesia?

Increase in the demand for communications between ships and shore. JRC has delivered not only the coast radio stations to Indonesia, but also the Vessel Traffic System (sea/port surveillance system) to the Strait of Malacca in which the traffic of ships is particularly high in the waters of Indonesia.

Why does Indonesia need a ship-to-shore radio communication system?

It is mandatory to develop the ship-to-shore radio communication system to cover all the waters of Indonesia as the measure for safety of ships sailing in the Indonesian sea areas that have grown to be the trunk arteries of international shipping. Increase in sea accidents as the marine traffic is growing.

Is constructing base stations a major challenge in Indonesia?

Latest Industry News: Indosat Business Announces Advanced AI Solutions for Indonesia's Oil and Gas Sector Yulis Widyo Marfiah, the acting Director of Telecommunications and Information Services at BAKTI, explained to Antara that constructing base stations in such areas is a major challenge.

What is Jakarta Mass Rapid Transit Project Phase 1?

The Jakarta Mass Rapid Transit Project Phase 1, for which we have already delivered signaling systems including SPARCS and the AFC*3 system, is a 15.7km north-south line that connects the Jakarta metropolitan area from Lebak Bulus Station to Bunderan HI Station.
