Jakarta power system solar power supply

Overview

Will Indonesia build a 100 GW solar power plant?

Jakarta, Aug- Indonesia will build a 100 Gigawatt (GW) Solar Power Plant (PLTS). The program plans to build 80 GW of solar power plants and 320 GWh of Battery Energy Storage System (BESS) to be managed by the Merah Putih Village Cooperative (KDMP) in 80,000 villages, and 20 GW of Centralized solar power plants.

Can solar power plants be used in Indonesia?

Indonesia possesses solar energy potential with a capacity ranging from 3,300 GW to 20,000 GW, spanning from Sabang to Merauke. With increasingly affordable, modular, and easy-to-build and operate solar power plant (PLTS) technology, this project could serve as a strategic solution to provide reliable and affordable energy access across Indonesia.

Who is solar power Indonesia?

Solar Power Indonesia partners with leading industrial customers and international consultants to deploy solar power systems that are reliable, efficient, and sustainable. We specialise in standalone and high reliability back-up power systems than integrate energy generation and storage solutions matched to your project requirements.

What kind of energy does Jakarta use?

Jakarta's energy system relies heavily on fossil fuels, in particular natural gas (49%), crude oil (28%) and coal (19%). Most electricity is generated from coal-fired power plants, while gasoline and diesel are the main fuels for private vehicles and motorcycles.
