

EQACC SOLAR

Korea Electric Power Storage Company

Overview

Are South Korean companies investing in energy storage systems?

Less than a decade ago, South Korean companies held over half of the global energy storage system (ESS) market with the rushed promise of helping secure a more sustainable energy future. However, a string of ESS-related fires and a lack of infrastructure had dampened investments in this market.

How is the energy storage industry shaped in South Korea?

The Energy Storage industry in South Korea is shaped by several key considerations that potential investors and stakeholders should be aware of. First, the country is heavily investing in renewable energy, aligning with its goal to achieve carbon neutrality by 2050.

What is Asia's largest battery energy storage system?

Billed as Asia's largest battery energy storage system for grid stabilization purposes, the system has a power output of 978 MW and a storage capacity of 889 MWh. The ceremony marking the completion of construction was held on Thursday, September 27, at the 154 kV Bubuk Substation in Miryang.

Will KEPCO build a new battery energy storage system?

KEPCO delivered the project in line with the 9th Basic Electricity Supply and Demand Plan, which aims for a 40% share of renewable energy in Korea's electricity mix by 2034. The Korean utility has laid down plans to build another 300 MW battery energy storage system, which it plans to deliver by 2028.
