Laos backup uninterruptible power supply

Overview

What is the uninterruptible power supply (UPS) market?

The Uninterruptible Power Supply (UPS) market is a subset of the larger battery technology industry. UPS systems are designed to provide a continuous supply of power to critical systems and equipment in the event of a power outage. They are typically used in data centers, medical facilities, and other mission-critical applications.

How can Lao PDR-generated electricity be exported to neighbouring countries?

Integration of the Electricity System To effectively supply Lao PDR-generated electricity domestically and for export to neighbouring countries without any surplus, the power system for domestic supply should be integrated and operated with dedicated transmission lines for export.

How is electricity sold in Lao PDR?

The business of selling electricity in Lao PDR is regulated by the Electricity Law, with one state-owned company – EDL – selling domestic electricity. EDL procures the electricity that it sells from IPPs and EDL-Gen, the domestic power producers.

What is the power sector in Lao PDR?

The power sector in Lao PDR is governed by MEM. The power system generators for domestic supply are the IPPs and EDL-Generation Public Company (EDL-Gen). The domestic transmission and distribution company (i.e. 115-kV and distribution lines) is EDL, and the domestic transmission company (i.e. 500-kV and 230-kV lines) is EDL-T.
