# **Lifepo4 power station factory in Norway**

## Overview

---

Where is Europe's first lithium iron phosphate Gigafactory?

Morrow Batteries has opened Europe's first lithium iron phosphate (LFP) gigafactory in Arendal, Norway, with an annual capacity of 1 GWh. From pv magazine ESS News.

Where are LFP batteries made?

Morrow Batteries has inaugurated its gigawatt factory for LFP batteries in Norway. It has a production capacity of one gigawatt - or up to three million battery cells. According to the company, test production has already started at the facility in Arendal in southern Norway. Commercial production will start at the end of the year.

What is Europe's first gigawatt-scale factory for LFP batteries?

Jonas Gahr Støre, Prime Minister of Norway, was on hand to inaugurate the new factory, which is Europe's first gigawatt-scale factory for LFP batteries. According to the company, it will work closely with customers to fine tune the production equipment to achieve serial production quality over the following months.

Is Morrow batteries Europe's first Gigafactory for lithium iron phosphate (LFP) batteries?

Morrow Batteries says that its plant "is Europe's first gigafactory for Lithium Iron Phosphate (LFP) batteries" - and the manufacturer is planning three more factories in Arendale.
