

# Lighting backup battery cabinet installation height

## Overview

---

Minimum cabinet height = Rack height (to top of rail) + Battery height + Space above battery (12" ideal) + Charger height + 6" (for space above charger)

How to protect a lithium battery energy storage cabinet?

At the same time, setting the charging and discharging parameters, configuring the safety and protection settings, and protecting the lithium battery energy storage cabinet from potential dangers such as overcurrent, overvoltage, and overtemperature are necessary.

What should be inspected for incoming battery room equipment?

Incoming Battery room Equipment shall be visually inspected for damage / defects occurred during transportation and conformance to all applicable requirements. Battery room Equipment shall be new and unused.

How much light do I need for a battery room?

Battery room lighting shall be installed to provide a minimum level of illumination of 30-ft candles (300 lux). Emergency lighting with compatible illumination level shall be installed to operate in the event of loss of mains power supply.

What are the requirements for a battery room?

Battery room walls and floor shall be made of concrete construction. Battery rooms shall be provided with enclosed and gasketed (i.e., vapor tight) corrosion resistant lighting fixtures as specified in SAES-P-123. Battery room lighting shall be installed to provide a minimum level of illumination of 30-ft candles (300 lux).
