

**EQACC SOLAR**

# **Liquid-cooled solar container battery cabinet is difficult to open**

## Overview

---

Can a liquid cooled and air cooled cabinet be paired together?

Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box. Outdoor cabinets are manufactured to be a install ready and cost effective part of the total on-grid, hybrid, off-grid commercial/industrial or utility scale battery energy storage system. BESS string setup examples are:.

What are battery energy storage systems (Bess)?

As the demand for sustainable energy solutions grows, Battery Energy Storage Systems (BESS) have become crucial in managing and storing energy efficiently. This year, most storage integration manufacturers have launched 20-foot, 5MWh BESS container products.

What is included in a battery cabinet?

Each battery cabinet includes an IP56 battery rack system, battery management system (BMS), fire suppression system (FSS), HVAC thermal management system and auxiliary distribution system. Outdoor liquid cooled and air cooled cabinets can be paired together utilizing a high voltage/current battery combiner box.

What temperature should battery cells be kept in a cooling unit?

The cooling unit must ensure the maximum temperature of the battery cells within the container does not exceed the threshold set by the battery manufacturer (such as 45°C or 50°C) at the end of these cycles. Operating battery cells above 35°C accelerates aging, resulting in faster degradation.
