

EQACC SOLAR

Lisbon s largest charging station for energy storage

Overview

Where are the charging stations located in Lisbon?

The charging stations are located on Rua do Município, in the public parking area and next to the P1 parking area on Rua Manuel Bentes Júnior. They represent a total investment of €20,000 and are part of an initiative to provide a valid alternative to petrol or diesel cars and to meet the increasing demand for charging stations.

What is the largest residential building in Lisbon?

With 26 floors above ground, 195 apartments and 352 parking spaces on an area of more than 50,000 square meters, it is one of the largest residential projects in the city. The Infinity Tower focuses on environmental technology and sustainability and is considered the tallest and most striking residential building in Lisbon's city center.

How many kW can a Siemens wallbox charge?

The wallboxes are distributed over six "charging islands" on three floors. A picture accompanying the press release shows a charger with a Type 2 socket. Siemens also offers the wallbox with a permanent type 2 cable. The VersiCharge can provide charging capacities of up to 22 kW.

What is a charging management dashboard & how does it work?

It allows for dynamic and intelligent on-site charging management. The dashboards, which are intuitive and easy to use, present comprehensive information to the building manager or operator who can instantly view all information about each charger, as well as monitor energy consumption in real time.
