Lome anti-dumping on energy storage

Overview

Are anti-dumping duties threatening battery installations in the US?

Battery installations in the U.S. are threatened by the imposition of anti-dumping, countervailing duties on anode materials. The supply chain for Active Anode Materials (AAM) is dominated by Chinese producers, with attempts to establish the full supply chain outside of China remains years away.

Are anti-dumping duties on active anode materials threatening battery installations?

Battery installations in the U.S. are threatened by the imposition of anti-dumping, countervailing duties on active anode materials. The supply chain for Active Anode Materials (AAM) is dominated by Chinese producers, with attempts to establish the full supply chain outside of China years away. From ESS News.

Will a new antidumping/countervailing duties investigation affect lithium-ion energy storage and EV batteries?

A new antidumping/countervailing duties (AD/CVD) investigation could affect domestic manufacturing and deployment of lithium-ion energy storage and EV batteries in the United States.

Which international trade issues will remain a concern for energy storage projects?

Two major areas of international trade that will remain causes of concern for energy storage projects are the application of tariffs and supply chain integrity.
